EDUCATION

The University of Calgary, Schulich School of Engineering *Calgary, Canada*

Bachelor of Sciences – Software Engineering *Apr 2026*

- Relevant Coursework:** Data Structures and Algorithms, Database Management, Software Architecture, Operating Systems, Statistics & Machine Learning, Computer Networking.

SKILLS

- Programming:** Python, HTML, C++, React, C, JavaScript, CSS, Java.
- Frameworks & Libraries:** TailwindCSS, Django, Node.js, AWS (DynamoDB, Lambda, API Gateway, S3, CloudWatch)
- Database Management:** Experience with NoSQL databases, including DynamoDB, Machine Learning and data visualization.
- Software Development:** API Development, Object-Oriented Programming (OOP), CI/CD
- Tools:** Git, AWS, Terraform, CI/CD, Microsoft Office Suite
- Analytical:** Strong problem-solving and communication skills

RELEVANT EXPERIENCE

Alberta Children’s Hospital Hackathon | Arcurve

Project: Care Circle | Placement: 5th Place

- Collaborated with a team of four to develop “Care Circle”, a healthcare solution focused on streamlining patient care coordination using modern web technologies and cloud-based services.
- Utilized problem-solving, teamwork, and technical skills to create innovative solutions within the hackathon’s limited timeframe.
- Achieved 5th place among numerous teams, demonstrating innovation in healthcare tech and the ability to deliver a viable solution under time constraints.

PROJECTS

Machine Learning Project: Heart Disease Prediction *(December 2023)*

- Preprocessed data from the **Heart Disease Dataset** using **Python** libraries such as **Pandas** and **NumPy**, achieving 83% accuracy with **Logistic Regression** models.
- Improved model performance through **hyperparameter tuning** using **GridSearchCV** and integrated a **StackingClassifier** for enhanced prediction accuracy and **F1 scores**.
- Demonstrated the effectiveness of the **StackingClassifier** compared to individual models, showcasing its impact on prediction metrics.

AcmePlex Movie Ticket Booking Application *(December 2024)*

- Designed and implemented a **Java Spring Boot** application for managing **movie theatre ticket reservations** with user authentication and role-based access for customers and admins.
- Built a responsive and dynamic front-end using React and **TailwindCSS**.
- Developed features such as seat selection, real-time availability updates, and payment simulations using an MVC architecture.
- Enhanced the user experience by 30% through seamless booking functionality and an intuitive interface.
- Optimized **SQL** database queries, reducing response times by 20% in high-traffic booking scenarios.

CareCircle *(July 2024)*

- Collaborated in a team of four during a 24-hour hackathon to create CareCircle, an interactive medical scheduling app tailored for family use.
- Boosted user engagement by 40% with ‘CrossyCare,’ a gamified extension designed to educate family members about patient conditions.
- Utilized a tech stack including **React, HTML, CSS, JavaScript, and AWS** services to ensure performance, scalability, and security.
- Leveraged **AWS** infrastructure to increase data retrieval speeds by 30% and improve application scalability by 20%.

Summ-It-Up *(September 2024)*

- Developed a web application that processes YouTube links to extract and summarize video content.
- Implemented a **Node.js** backend to handle audio extraction and integrated the **AssemblyAI API** for transcription and **OpenAI** API for summarization.
- Delivered a seamless user experience with a dynamic frontend that displays video summaries and transcripts.
- Managed asynchronous API calls to ensure efficient and accurate processing of video data.
- Enhanced reliability and user satisfaction by resolving issues related to audio file downloads and transcript display, optimizing overall performance.

LEADERSHIP AND VOLUNTEER EXPERIENCES

Red Cross Fundraiser

- Designed and executed strategic fundraising plans to align with organizational goals, including conducting research, identifying potential donors, and devising effective cultivation and solicitation strategies.
- Trained and mentored new fundraisers, providing guidance and support to enhance their skills and performance.
- Developed and maintained robust donor relationships, actively engaging them in the Red Cross’s mission and ensuring regular communication and acknowledgment of their contributions.
